

SAVING ENERGY *Saves Money*

Energy Kit

LED NIGHT LIGHT

Keep your lights off when the nightlight is off, it indicates that there is enough daylight!

SHOWER TIMER

Monitor and decrease shower times to save water and natural gas.

POWER STRIP

Even when your TV and appliances are off, they are using energy. Turning off the power strip will cut energy to these devices.

ENERGY & WATER CONSERVATION

WHEELS provide great tips for saving electricity, water and natural gas!

Smart Meters

EASY TO READ DIGITAL DISPLAY

Display will alternate between displaying 5 numerical eights (88888) & your energy usage in kWh. To calculate current use: subtract reading from previous month's consumption.

ONLINE ENERGY MANAGEMENT TOOLS

High-usage alerts & weekly reports

PEAK DEMAND

- Reduce electricity use between 11 am & 7 pm (especially on hot days)
- Wash the laundry during hours when the demand for electricity is low
- Charge devices such as cell phones at night when electricity demand is low
- Use "delay start" function on dishwasher to run during low demand hours

Environment

The average single bedroom apartment uses **12,000 kWhs** !

That is the equivalent of :

936 gallons
of gasoline consumed

19,815 miles
driven by an average
passenger vehicle

8,939 pounds
of coal burned

3 tons
of waste sent to the landfill

To offset the emissions it would take : **6.8 acres** of US forests in one year

Water & Gas

TURN OFF FAUCETS WHEN NOT IN USE

While soaping hands, shaving & brushing teeth

FAUCET AERATORS

Replace faucet aerators with low-flow ones 1.5 gpm or less

SHOWERHEADS

Replace with low-flow showerheads 1.5 gpm

INCANDESCENT LAMPS

Replace 60W lamps with equivalent CLF 13W lamps or LED 9W lamps

NEW APPLIANCES & ELECTRONICS

While shopping for new appliances or electronics, look for the ENERGY STAR label
